Relevant Experience

Post To Sold || Back End Developer || Deployed Link: <https://pr0jectnum2.herokuapp.com/> **GitHub Link:** <https://github.com/kimnana45/Project2>

Post To Sold is a website that let users create their own account. Users are then able to post items they would like to sell, purchase items from other users, and view all the items that are available.

Role: research and implement Filestack API in the app to work with upload image function. Help created Sequelize database. Assist in writing the routes for posting items and purchase items.

Utilize: Sequelize, NodeJs, Express, Handlebars, Javascript, Heroku, Bootstrap, HTML and CSS

The Classic Genius || Back End Developer || Deployed Link: <https://demetrio09.github.io/Project-1/> **GitHub Link:** <https://github.com/Demetrio09/Project-1>

The Classic Genius is an app designed to let user collect scholar research articles from many resources, while playing classical music to enhance the user's study environment. If the user likes what they hear, they can click on the song title, which will take them to last.fm library that will provide additional information on the song and artist.

Role: created functions to play music. Research and implement the last.fm API key. Assist in designing the layout of the page.

Utilize: HTML, CSS, JSON, Materialize, AJAX, HTTP GET requests, and Server-side APIs

The Travelers Compass || Back End Developer || Deployed Link: <https://gentle-ridge-35373.herokuapp.com/> **GitHub Link:** <https://github.com/kimnana45/The-Travelers-Compass>

The Travelers Compass is a MERN stack application that allows user to create trip itinerary with unique trip code. When that trip code is share with group members, all travelers in the group can access the shared trip itinerary and update information as needed. The Travelers Compass is a diary that keeps all of your travel information in one place, so your group can plan the trip together with optimum efficiency.

Role: Created Mongo database for the application. Create the design for budget page and gallery page. Assist in writing routes to store and get information from database. Use React Hooks and GlobalStore to create functional components for the app.

Utilized: Mongoose, NodeJs, Express, React, Javascript, Filestack, Algolia, Datepicker, Moment, React Router, Heroku, Bootstrap, HTML and CSS.
